About Me

I'm a Computer Engineering student, passionate about exploring both hardware and software to solve complex problems and develop innovative technologies. My studies equip me with a strong foundation in programming, system design, and algorithms, preparing me for a future in the tech industry. Outside of academics, I serve as a Youth Officer, where I focus on empowering young people through community initiatives, leadership programs, and advocacy efforts. This role has honed my skills in communication, teamwork, and social responsibility, while also allowing me to make a positive impact in my community. Additionally, I work as a freelance graphic editor, combining my creativity with technical expertise to design digital artwork, logos, and marketing materials for a diverse range of clients. Through freelancing, I've gained experience in project management, client communication, and entrepreneurship, all of which complement my technical background. Balancing these roles allows me to nurture a diverse skill set and contribute meaningfully in both the digital and social spheres.

Experience

- Graphics Designer**
Free Lancing
- Auxillary Councilor**
At Team Albay Youth Organization
- Membership Director**
At Institute of Computer Engineers of the Philippines Region5
